## **Street Children**

(extract from: ON MISSION: Frontline News of the ADRA Network)

ADRA Rwanda in cooperation with the Ministry of Youth and Sports, Cultural and Vocational Training has just started a program to benefit street children. Currently, this program is providing support to 550 children. The main objective of this program is to reunify these children with their families and to provide technical skills to the children within the center before integrating them back into the society.

During the month of June, the center was rehabilitated and fences were rebuilt. Children originally from Butare have been transferred from Shorongito to this newly established center. The World Food Program (WFP) has recently agreed to provide food to the center for six months.
